

Communication-capable damper actuator for adjusting air dampers in ventilation and air conditioning systems in buildings

- Air damper size up to approx. 4 m²
- Torque 20 Nm
- Nominal voltage AC/DC 24 V
- Control modulating 0 ... 20 V phase cut
- Position feedback
 DC 2 ... 10 V or variable

Technical data				
Electrical data				
Nominal voltage	AC 24 V, 50/60 Hz / DC 24 V			
Power supply range	AC 19.2 28.8 V / DC 21.6 28.8 V			
Power consumption In operation	3.5 W at nominal torque			
At rest	1.25 W			
For wire sizing	6 VA			
Connection	Cable 1 m, 4 x 0,75 mm ²			
Functional data	Factory settings	Variable	Settings	
Torque (nominal torque)	Min. 20 Nm at nominal voltage	25%, 50%, 75% reduced		
Control	$0 \dots 20 \text{ V}$ phase cut, input impedance $8.2 \text{ k}\Omega$			
Position feedback (measuring voltage U)	DC 2 10 V, max. 0.5 mA	Start point DC 0,5 8 V End point DC 2,5 10 V		
Uni-rotation	±5%			
Direction of rotation	Can be selected with 0 / 1			
Direction of motion at Y = 0 V	In switch position 0 🗸 or 1 🤼	Electronically reversible		
Manual override	Disengaging the gearing latch by means of a pushbutton, self-resetting			
Angle of rotation	Max. 95°			
Running time	150 s / 90°⊲	86 346 s		
Automatic adjustment of running time,	Manual triggering of this adaption by	Automatic adaption whenever		
operating range and measuring signal U	pressing the button «Adaption» or with	the supply voltage is switched		
o match the mechanical angle of rotation	the PC-Tool	on, or manual triggering		
Override control	MAX (maximum position) = 100% MIN (minimum position) = 0%	MAX = $(MIN + 30° \triangleleft)$ 100% MIN = 0% $(MAX - 30° \triangleleft)$		
Sound power level	Max. 45 dB (A) With a running 86 s = 45 time of 346 s < 35			
Position indication	Mechanical, plug-on			
Safety				
Protection class	III Safety extra-low voltage			
Degree of protection	IP54 in all mounting positions			
EMC	CE according to 2004/108/EC			
Mode of operation	Type 1 (to EN 60730-1)			
Rated impulse voltage	0.8 kV (to EN 60730-1)			
Control pollution degree	3 (in acc. with EN 60730-1)			
Ambient temperature range	−30 +50°C			
Non-operating temperature	−40 +80°C			
Ambient humidity range	95% r.H., non-condensating (to EN 60730-1)			
Maintenance	Maintenance-free			
Dimensions/weight				
Dimensions	See «Dimensions» on page 4			
Weight	Approx. 910 g			

Communication-capable damper actuator AC/DC 24 V, 20 Nm, control 0 ... 20 V phase cut

Safety notes

- The damper actuator is not allowed to be used outside the specified field of application, especially in aircraft or in any other airborne means of transport.
- It may only be installed by suitably trained personnel.
 All applicable legal or institutional installation regulations must be complied with.
- The device may only be opened at the manufacturer's site. It does not contain any parts that can be replaced or repaired by the user.
- · The cable is not allowed to be removed from the unit.
- When calculating the torque required, the specifications supplied by the damper manufacturers concerning the cross section, design and installation site, and the air flow conditions must be observed.
- The device contains electrical and electronic components and is not allowed to be disposed
 of as household refuse. All locally valid regulations and requirements must be observed.

Product features

Mode of operation

The actuator is controlled with a standard modulating signal of 2 ... 20 V phase cut and travels to the position defined by the control signal. Measuring voltage U serves for the electrical display of the damper position 0 ... 100% and as slave control signal for other actuators.

Parameterisable actuators

The factory settings cover the most common applications. The output signal and other parameters can be altered with the MFT-H parameterising device or the BELIMO Service Tool, MFT-P.

Simple direct mounting

Simple direct mounting on the damper spindle with a universal spindle clamp, supplied with an anti-rotation strap to prevent the actuator from rotating.

Manual override

Manual operation with self-resetting pushbutton possible (the gear is disengaged for as long as the button is pressed).

Adjustable angle of rotation

Adjustable angle of rotation with mechanical end stops.

High functional reliability

The actuator is overload-proof, requires no limit switches and automatically stops when the end stop is reached.

Home position

When the supply voltage is switched on for the first time, i.e. at commissioning or after pressing the «gear disengagement» switch, the actuator travels to the home position.

	Pos. direction of rotation switch		position		
	Y = 0	ccw Left s	stop		
((Y = 0	cw Right	stop		

The actuator then moves into the position defined by the control signal.

Accessories

Electrical accessories

Description	Data sheet	
Auxiliary switch SA	T2 - SA	
Feedback potentiometer PA	T2 - PA	
Manual parameterising device MFT-H	T2 - MFT-H	
PC-Tool MFT-P	T2 - MFT-P	
Position sensor SG24	T2 - SG24	
Digital position indication ZAD24	T2 - ZAD24	
Various accessories (clamps, shaft extensions etc.)	T2 - Z-SMA	

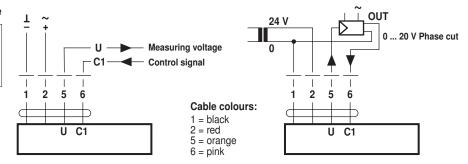

Electrical installation

Wiring diagram/example

Mechanical accessories

Note

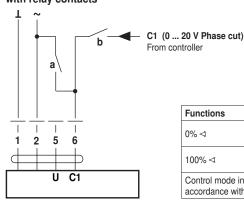

- · Connect via safety isolation transformer.
- Parallel connection of other actuators possible. Note the performance data.

Master/Slave control

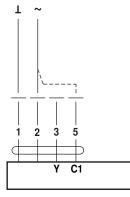

Position indication

Adapting the direction of rotation

Functional check

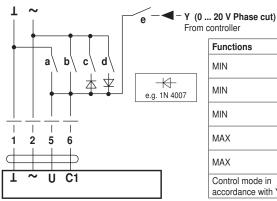

Procedure

- Apply AC 24 V to connection 1 and 2
- Disconnect connection 6:
- For direction of rotation 0:
- Actuator turns in the direction of
- For direction of rotation 1:
 Actuator turns in the direction of \(\lambda \)
- Short circuit connections 2 and 6:
- Actuator runs in the opposite direction

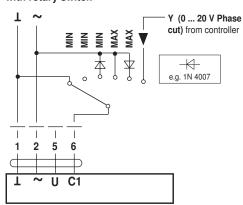

Functions for actuators with specific parameters

Operating controls and indicators

1 Direction of rotation switch

Switching over: Direction of rotation changes

(2) Pushbutton and green LED display

Off: No voltage supply or malfunction

Green on: Operation

Press button: Switches on angle of rotation adaption followed by standard operation

3 Pushbutton and yellow LED display

Off: Standard operation

Yellow on: Adaption or synchronising process active

Press button: No function

(4) Gear disengagement switch

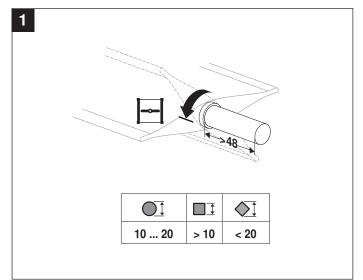

Press button: Gear disengaged, motor stops, manual operation possible

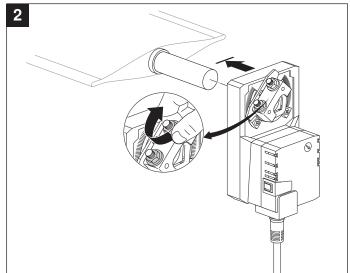

Release button: Gear engaged, synchronisation starts, followed by standard operation

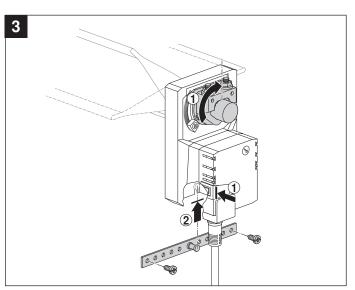

5 Service plug

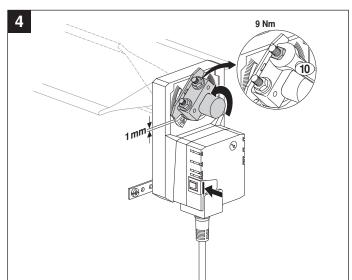

For connecting parameterising and service tools
