## Electric Actuator Type BS

Spring Return 4 Nm, IP55/IP66

ELODRIVE-Actuators are intended to be used for the operation of dampers, valves and other process control elements. The BS-Series of actuators are equipped with a mechanical spring that ensures a failsafe opening or closing of the damper or valve in case of a power supply interruption. Direct mounting of the actuators onto the damper shafts is achieved via the centric clamping adapter. An enclosed anti-rotation strap ensures that the actuator remains in a defined position.
The maximum rotation angle is $95^{\circ}$.

The following applies for all models of the product line B:

## General Conception

- One size for all types
- Identical accessories for all models
- Identical control functionality for all models
- Homogeneous control and voltage variants for all models
■ Universal wiring schematics

## Operational Functionality

■ Simple one-handed manual positioning - no disengaging of gears required

- Direction of rotation (CW or CCW) and also signal $0 \ldots 10 \mathrm{~V}$ and $2 \ldots 10 \mathrm{~V}$
selectable via switch

## Motor and Gear Concept

■ Brushless DC-Motor - no wear and tear

- Constant running time, independent of load
■ Constant torque throughout the entire operating range
■ Synchronized parallel operation
- Very quiet operating

## Control Concept

■ Wide supply voltage range (120/230V AC)
■ Automatic shutoff either when reaching programmed hard-stop or when reaching mechanical end-stop
■ No return voltage

## Adaptation possibilities

■ Centric clamping adapter as a standard feature
■ Form fit adapter available in different sizes
■ Special solutions for aggressive environments available upon request

## Housing Design

■ Protection degree IP55 and IP66 without additional encasement
■ Direct mounting even in limited spaces
■ Positioning of the actuator can be achieved either via the enclosed antirotation strap or by using additional screws

## Scope of delivery

## - Centric clamp adapter

- Position indicator Mounting set for external limit stops (only 5 and 10 Nm )
- Anti rotation strap
- Allen key
- Operation manual
- Actuators with: running time of 30 sec . 15 Nm and 20 Nm torque are delivered without mounting kit for external limit stops

Foot mounting bracket

Crank arm sets

Form fit adapter

Anti rotation strap

Auxilliary switches and Potentiometers
