The M9203-xxx-2(Z) Series Electric Spring Return Actuators provide control of dampers in Heating, Ventilating, and Air Conditioning (HVAC) systems. All actuators in this series provide $27 \mathrm{lb} \cdot$ in ( $3 \mathrm{~N} \cdot \mathrm{~m}$ ) rated torque. A mechanical spring return system provides rated torque with or without power applied to the actuator. The series includes the following control options:

- On/Off, $24 \mathrm{~V}, 85$ to 264 VAC power
- On/Off and Floating Point, 24 V power
- Proportional, 24 V power, for $0(2)$ to 10 VDC or $0(4)$ to 20 mA Control Signal
These actuators are configured for direct mounting and do not require a damper linkage. Actuators can be mounted directly to a damper shaft from $1 / 4$ to $1 / 2 \mathrm{in}$. ( 6 to 12 mm ) diameter with a universal clamp. An accessory crankarm and remote mounting kit are available for applications where the actuator cannot be direct-coupled to the damper shaft. An optional line voltage auxiliary switch indicates an end-stop position

Table 1: Features and Benefits (Part 1 of 2)

| Features | Benefits |
| :--- | :--- |
| $\mathbf{2 7}$ Ib•in (3 N•m) Rated Torque | Provides high torque in a compact package size to expand the range of damper <br> applications in HVAC systems. |
| Direct-Coupled Design | Requires no crankarm or linkage and is capable of direct mounting to a shaft up to <br> $1 / 2$ in. (12 mm) diameter and centered on a 1/2 in. (12 mm) shaft. |
| Reversible Mounting | Provides either clockwise or counterclockwise operation. |
| Electronic Stall Detection | Protects from overload at all angles of rotation. Power consumption is reduced in <br> holding mode. The actuator may be stalled anywhere in its rotation range without <br> the need for mechanical end switches. |
| Double-Insulated Construction | Eliminates need for electrical ground connection for regulatory agency compliance. |
| Microprocessor-controlled <br> Brushless DC Motor <br> (-AGx and -GGx types) | Provides constant runtime independent of torque. |
| External Mode Selection Switch <br> (-AGx and -GGx types) | Permits control logic reversal for Floating Control (-AGx types). Permits calibration, <br> input signal range selection, and control logic reversal for Proportional Control <br> $(-G G x$ types). |
| Integral Cables with Colored and <br> Numbered Conductors | Simplify installation and field wiring. |
| Integral 1/2 in. (13 mm) Threaded <br> Conduit Connector(s) | Simplify installation and field wiring. |

Table 1: Features and Benefits (Part 2 of 2)

| Features | Benefits |
| :--- | :--- |
| Optional Integrated Auxiliary Switch | Provides one integrated, line-voltage-capable Single-Pole, Double-Throw (SPDT) <br> switch with continuously adjustable switch point. Facilitates safety interfacing or <br> signaling. |
| Plenum Rated Models | Enable use in other environmental air spaces (plenums) in accordance with section <br> $300.22(C)$ of the National Electric Code. |
| Override Control <br> (Proportional Models Only) | Supports manual control system override applications through field wiring. |
| Underwriters Laboratories Inc.® (UL), <br> CE Mark, and C-Tick Compliance | Provides internationally recognized regulatory agency approvals. |
| Manufactured under International <br> Standards Organization (ISO) 9001 <br> Quality Control Standards | Ensures quality. |
| 5-Year Warranty | Protects consumer investment. |

## Application

IMPORTANT: Use these M9203-xxx-2(Z) Series Electric Spring Return Actuators only to control equipment under normal operating conditions. Where failure or malfunction of the electric actuator could lead to personal injury or property damage to the controlled equipment or other property, additional precautions must be designed into the control system. Incorporate and maintain other devices, such as supervisory or alarm systems or safety or limit controls, intended to warn of or protect against failure or malfunction of the electric actuator.

M9203-GGx-2(Z) Series Proportional Actuators M9203-GGx-2(Z) Series Actuators provide proportional modulation of dampers requiring up to $27 \mathrm{lb} \cdot \mathrm{in}$. ( $3 \mathrm{~N} \cdot \mathrm{~m}$ ) in HVAC systems that are controlled by an electronic controller or positioner. The actuator responds to 0 to 10 VDC or 2 to 10 VDC control signals. With the addition of a 500 ohm resistor, the actuator responds to a 0 to 20 mA or 4 to 20 mA signal. A 0 to 10 VDC or 2 to 10 VDC feedback signal indicates position and provides support for master-slave applications.

Manual control system override applications are supported through field wiring, and include:

- override to MIN position
- override to MAX position
- override to MIN, MID, and MAX position

The M9203-GGA-2 and M9203-GGA-2Z actuators include plenum-rated cables and are specially configured for installation in spaces used for environmental air-handling purposes, other than ducts and plenums, as specified in National Fire Protection Association (NFPA) 70: National Electrical Code section 300.22(C), Other Space Used for Environmental Air. The space over a hung ceiling, when used for environmental air handling purposes, is an example of the type of space for which these actuators are configured.
The M9203-GGx-2 actuators have 150 second constant runtime for $90^{\circ}$ rotation. The M9203-GGx-2Z actuators have 90 second constant runtime for $90^{\circ}$ rotation. When combined with other actuators in a control system, this choice provides flexibility in synchronizing the movement of equipment driven from a single proportional command.

## M9203-AGx-2(Z) Series On/Off and Floating Point Actuators

M9203-AGx-2Z Series Actuators provide on/off control or modulation of dampers requiring up to $27 \mathrm{lb} \cdot \mathrm{in}$. ( $3 \mathrm{~N} \cdot \mathrm{~m}$ ) in HVAC systems. Floating point control is provided from a triac or relay. On/off control can be provided from a manual switch, controller, auxiliary switch from a fan motor contactor, or similar device.

The M9203-AGA-2 and M9203-AGA-2Z actuators include plenum-rated cables and are specially configured for installation in spaces used for environmental air-handling purposes other than ducts and plenums as specified in National Fire Protection Association (NFPA) 70: National Electrical Code section 300.22(C), Other Space Used for Environmental Air. The space over a hung ceiling, when used for environmental air handling purposes, is an example of the type of space for which these actuators are configured.

The M9203-AGx-2 actuators have 150 second constant runtime for $90^{\circ}$ rotation. The M9203-AGx-2Z actuators have 90 second constant runtime for $90^{\circ}$ rotation. When combined with other actuators in a control system, this choice provides flexibility in synchronizing the movement of equipment driven from a single proportional command.

## M9203-Bxx-2(Z) Series On/Off Actuators

M9203-Bxx-2(Z) Series Actuators provide on/off control of dampers requiring up to $27 \mathrm{lb} \cdot \mathrm{in}$. ( $3 \mathrm{~N} \cdot \mathrm{~m}$ ) in HVAC systems. On/off control can be provided from a manual switch, controller, auxiliary switch from a fan motor contactor, or similar device.

## Operation

M9203-xxx-2(Z) Series Actuators provide $95^{\circ}$ of rotation. A graduated scale from $-5^{\circ}$ to $90^{\circ}$ and a position indicator provide visual indication of stroke. When power fails during service, the mechanical spring return system provides rated torque to the connected equipment, returning it to the home position.

## M9203-GGx-2(Z) Series Proportional Actuators

M9203-GGx-2(Z) Series Actuators use a brushless DC motor controlled by a microprocessor. The microprocessor drives the motor at constant speed, independent of torque. The microprocessor also monitors the brushless DC motor's rotation to prevent damage to the actuator in a stall condition. The actuator can be stalled anywhere within its rotation range without the need for mechanical end switches. Power consumption is reduced in the holding mode.

The M9203-GGB-2 and M9203-GGB-2Z models are provided with one integrated, line-voltage-capable auxiliary SPDT switch. The switch point is independently and continuously adjustable throughout the full range of actuator stroke. Auxiliary switches are double-insulated so an electrical ground is not required.

## M9203-AGx-2(Z) Series On/Off and Floating Point Actuators

M9203-AGx-2(Z) Series Actuators use a brushless DC motor controlled by a microprocessor. The microprocessor drives the motor at constant speed, independent of torque. The microprocessor also monitors the brushless DC motor's rotation to prevent damage to the actuator in a stall condition. The actuator can be stalled anywhere within its rotation range without the need for mechanical end switches. Power consumption is reduced in the holding mode.

The M9203-AGB-2 and M9203-AGB-2Z models are provided with one integrated, line-voltage-capable auxiliary SPDT switch. The switch point is independently and continuously adjustable throughout the full range of actuator stroke. Auxiliary switches are double-insulated so an electrical ground is not required.

## M9203-Bxx-2(Z) Series On/Off Actuators

M9203-Bxx-2(Z) Series Actuators use a DC brush motor controlled by analog electronics. The actuator can be stalled anywhere within its rotation range without the need for mechanical end switches. Power consumption is reduced in the holding mode. Two different voltage ratings are available for On/Off Actuators:

- M9203-BGx-2: AC $24 \mathrm{~V} 50 / 60 \mathrm{~Hz}$ or DC 24 V power
- M9203-BUx-2(Z): AC 85 to 264 V 50/60 Hz power

The M9203-BUx-2(Z) actuators are double-insulated so an electrical ground is not required.

The M9203-BxB-2(Z) models are provided with one integrated, line-voltage-capable auxiliary SPDT switch. The switch point is independently and continuously adjustable throughout the full range of actuator stroke. Auxiliary switches are double-insulated so an electrical ground is not required.

1. Furnished with the damper and may be ordered separately.

## Repair Information

A number of replacement parts are available; see
Table 3 for more details. If an M9203-xxx-2(Z) Series Electric Spring Return Actuator fails to operate within its specifications, replace the unit. For a replacement electric actuator, contact the nearest Johnson Controls® representative.
