

Rotary actuator for butterfly valves

- Torque motor 160 Nm
- Nominal voltage AC 24...240 V / DC 24...125 V
- Control modulating, communicative, hybrid mode
- · with 2 integrated auxiliary switches
- Conversion of sensor signals
- Communication via BACnet MS/TP, Modbus RTU, Belimo-MP-Bus or conventional control

		2011
Technical data		
Electrical data	Nominal voltage	AC 24240 V / DC 24125 V
	Nominal voltage frequency	50/60 Hz
	Nominal voltage range	AC 19.2264 V / DC 19.2137.5 V
	Power consumption in operation	52 W
	Power consumption in rest position	7 W
	Power consumption for wire sizing	with 24 V 54 VA / with 230 V 68 VA
	Power consumption for wire sizing note	Imax 20 A @ 5 ms
	Auxiliary switch	2 x SPDT, 1 x 10° / 1 x 090° (ex works 85°)
	Switching capacity auxiliary switch	1 mA3 (0.5 inductive) A, AC 250 V
	Connection supply	Terminals 2.5 mm ²
	Connection control	Terminals 1.5 mm ²
	Connection auxiliary switch	Terminals 2.5 mm ²
	Parallel operation	Yes (note the performance data)
Functional data	Nominal torque	160 Nm (parameterized for D6250W/WL)
i diletional data	Communicative control	BACnet MS/TP (ex works)
	Communicative control	Modbus RTU
		MP-Bus
	Operating range Y	DC 210 V
	Input Impedance	100 kΩ
	Operating range Y variable	DC 0.510 V
	operating range in antalore	420 mA
	Position feedback U	DC 210 V
	Position feedback U note	Max. 0.5 mA
	Position feedback U variable	DC 0.510 V
	Setting emergency setting position (POP)	0100%, adjustable (ex works 0%)
	Bridging time (PF) variable	010 s (ex works 2s)
	Position accuracy	±5%
	Manual override	with hand crank, can be fixed in any position
	Running time motor	35 s / 90°
	Running time motor variable	30120 s
	Running time emergency control position	30 s / 90°
	Sound power level Motor	68 dB(A)
	Sound power level emergency control position	61 dB(A)
	Position indication	Mechanically (integrated)
Safety	Protection class IEC/EN	II reinforced insulation
•	Protection class UL	Il reinforced insulation
	Protection class auxiliary switch IEC/EN	Il reinforced insulation
	Degree of protection IEC/EN	IP66/67
	Degree of protection NEMA/UL	NEMA 4X, UL Enclosure Type 4X
	EMC	CE according to 2014/30/EU
	Low voltage directive	CE according to 2014/35/EU
	Certification IEC/EN	IEC/EN 60730-1 and IEC/EN 60730-2-14

	Rated impulse voltage supply	4 kV
	Rated impulse voltage control	0.8 kV
	Dated impulse veltage equilient equitals	0.E I/V

2.5 kV

Rated impulse voltage auxiliary switch

PRKCA-BAC-S2-T-250

SuperCap rotary actuator, modulating communicative hybrid mode, AC 24...240 V / DC 24...125 V, 160 Nm,

Technical data		
Safety	Control pollution degree	3
	Ambient temperature	-3050°C
	Non-operating temperature	-4080°C
	Ambient humidity	Max. 95% r.h., non-condensing
	Maintenance	Maintenance-free
Mechanical data	Connection flange	F07 (F05 only with accessory)
Weight	Weight	8.5 kg
Terms	Abbreviations	POP = Power off position / emergency setting position CPO = Controlled power off / controlled
		emergency control function
		PF = Power fail delay time / bridging time

Safety notes

- This device has been designed for use in stationary heating, ventilation and air conditioning systems and must not be used outside the specified field of application, especially in aircraft or in any other airborne means of transport.
- · Caution: Power supply voltage!
- Only authorised specialists may carry out installation. All applicable legal or institutional installation regulations must be complied during installation.
- Apart from the connection box, the device may only be opened at the manufacturer's site. It does not contain any parts that can be replaced or repaired by the user.
- The device contains electrical and electronic components and must not be disposed
 of as household refuse. All locally valid regulations and requirements must be
 observed.

Product features

Fields of application

The actuator is particularly suitable for utilisation in outdoor applications and is protected against the following weather conditions:

- UV radiation
- dirt / dust
- rain / snow
- Humidity

SuperCap rotary actuator, modulating communicative hybrid mode, AC 24...240 V / DC 24...125 V, 160 Nm,

Product features

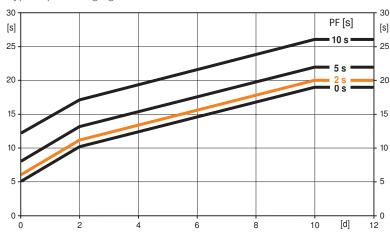

Pre-charging time (start up)

The capacitor actuators require a pre-charging time. This time is used for charging the capacitors up to a usable voltage level. This ensures that, in the event of an electricity interruption, the actuator can move at any time from its current position into the preset emergency setting position (POP).

The duration of the pre-charging time depends mainly on following factors:

- Duration of the electricity interruption
- PF delay time (bridging time)

Typical pre-charging time

PF[s]	[d]				
	0	1	2	7	≥10
0	5	8	10	15	19
2	6	9	11	16	20
5	8	11	13	18	22
10	12	15	17	22	26
			[s]		

[d] = Electricity interruption in days
[s] = Pre-charging time in seconds
PF[s] = Bridging time
Calculation example: Given an electricity
interruption of 3 days and a bridging time (PF) set
at 5 s, the actuator requires a pre-charging time of
14 s after the electricity has been reconnected (see

Delivery condition (capacitors)

The actuator is completely discharged after delivery from the factory, which is why the actuator requires approximately 20 s pre-charging time before initial commissioning in order to bring the capacitors up to the required voltage level.

Converter for sensors

Connection option for two sensors (passive, active or switching contacts). In this way, the analogue sensor signal can be easily digitised and transferred to the bus systems BACnet or Modbus.

Parameterisable actuators

The factory settings cover the most common applications.

The Belimo Assistant App is required for parameterisation via Near Field

Communication (NFC) and simplifies commissioning. Moreover, it provides a variety of diagnostic options.

The ZTH EU service tool provides a selection of both diagnostic and setting options.

Combination analogue - communicative

(hybrid mode)

With conventional control by means of an analogue positioning signal, BACnet or Modbus can be used for the communicative position feedback

Simple direct mounting

Simple direct mounting on the butterfly valve. The mounting orientation in relation to the butterfly valve can be selected in 90° (angle) increments.

Manual override

The valve can be manually operated using a hand crank. Unlocking is carried out manually by removing the hand crank.

Internal heating

An internal heater prevents condensation buildup.

Thanks to the integrated temperature and humidity sensor the built-in heater automatically switches on and off.

High functional reliability

The actuator is overload protected, requires no limit switches and automatically stops when the end stop is reached.

Setting emergency setting position

(POP)

The desired emergency setting position (POP) can be set between 0 and 100% with the "Belimo Assistant App" or ZTH EU. The setting allways refers to the adapted angle of rotation range. In the event of an electricity interruption, the actuator will move into the selected emergency setting position (POP).

PRKCA-BAC-S2-T-250

SuperCap rotary actuator, modulating communicative hybrid mode, AC 24...240 V / DC 24...125 V, 160 Nm,

Product features

Bridging time

Electricity interruptions can be bridged up to a maximum of 10 s.

In the event of an electricity interruption, the actuator will remain stationary in accordance with the set bridging time. If the electricity interruption is greater than the set bridging time, then the actuator will move into the selected emergency setting position (POP).

The pre-programmed bridging time is set to 2 s. This can be modified on site in operation with the use of the "Belimo Assistant App".

Flexible signalization

The actuator has one auxiliary switch with a fixed setting (10°) and one adjustable auxiliary switch $(0...90^{\circ})$.

Electrical installation

PRKCA-BAC-S2-T-250

SuperCap rotary actuator, modulating communicative hybrid mode, AC 24...240 V / DC 24...125 V, 160 Nm,

Electrical installation

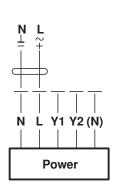

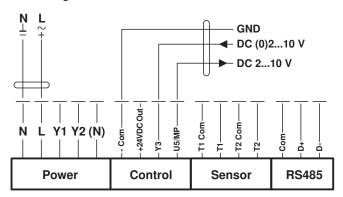

Notes

- · Caution: Power supply voltage!
- Parallel connection of other actuators possible. Observe the performance data.
- The main power supply for the actuator and for the auxiliary switches shall be from the same phase.
- The wiring of the line for BACnet MS/TP / Modbus RTU is to be carried out in accordance with applicable RS485 regulations.

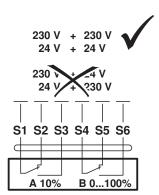

Wiring diagrams

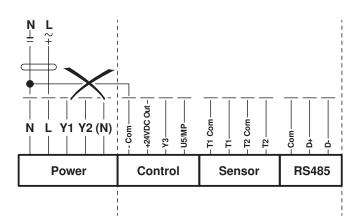

AC 24...240 V / DC 24...125 V Modulating control

Connection auxiliary switch

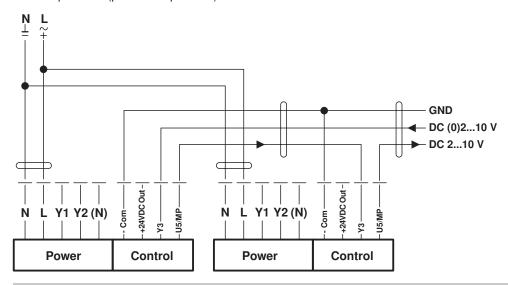

Power supply must not be connected to the signal terminals!

Electrical installation

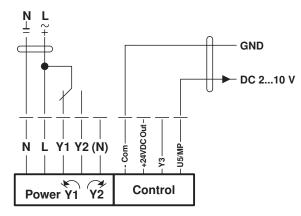

Follow-up control (position-dependent)

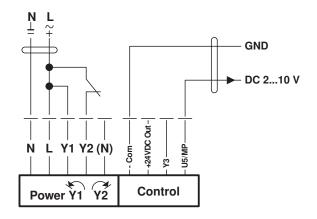

Functions

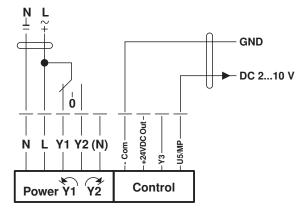

Functions for actuators with specific parameters (Parametrisation with NFC app necessary)

Control open-close

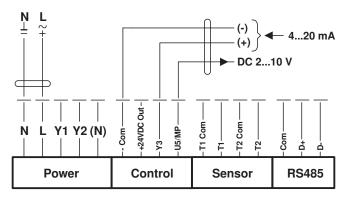

Control 3-point

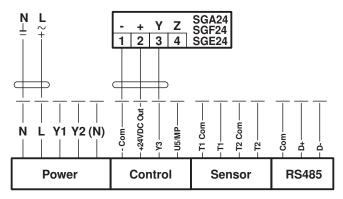

Functions

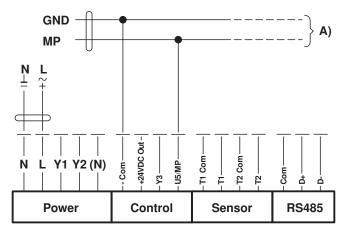

Control 4...20 mA

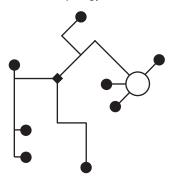

Positioner SG..

Connection on the MP-Bus

Network topology

There are no restrictions for the network topology (star, ring, tree or mixed forms are permitted). Supply and communication in one and the same 3-wire cable

- no shielding or twisting necessary
- · no terminating resistors required

Note

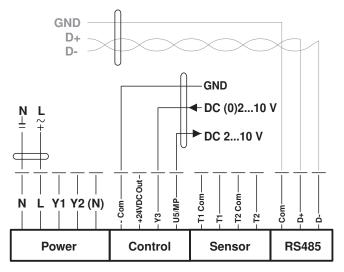

Maximum output power «+ 24VDC out» 1.2 W @ 50 mA!
A separate safety transformer must be used for higher performance!

A) Additional actuators (max. 8)

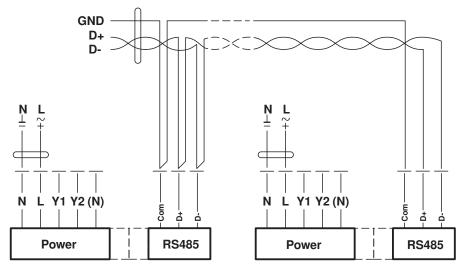

Functions

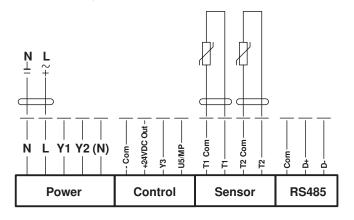

Connection BACnet MS/TP / Modbus RTU with analog setpoint (hybrid mode)

Connection BACnet MS/TP / Modbus RTU

Connection of passive sensors (BACnet MS/TP / Modbus RTU)

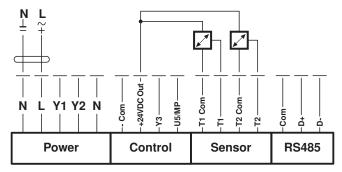

1)	2)
200 Ω2 kΩ	0.1 Ω
2 kΩ10 kΩ	1 Ω
10 kΩ55 kΩ	10 Ω

- 1) Resistance range
- 2) Resolution
- Suitable for Ni1000 and PT1000
- Suitable Belimo types 01DT-...

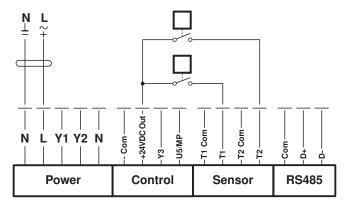

Functions

Connection of active sensors (BACnet MS/TP / Modbus RTU)

Switching contact connection (BACnet MS/TP / Modbus RTU)

Possible voltage range: DC 0...10 V (resolution 5 mV) For example, for the detection of:

- Active temperature sensors
- Flow sensors
- Pressure- / differential pressure sensors

Requirements for switching contact: The switching contact must be able to accurately switch a current of 10 mA @ 24 V.

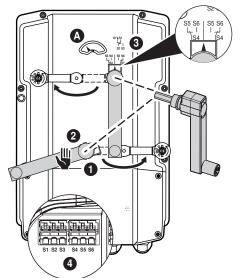

For example, for the detection of:

- Flow monitors
- Operating- / fault messages from chillers

Operating controls and indicators

Auxiliary switch settings

Note: Perform settings on the actuator only in deenergised state.

Gear disengagement

Opening the manual override cover and adjusting the hand crank. Manual override is possible.

Manual override control

Turn the hand crank until the desired switching position (A) is indicated and then remove the crank.

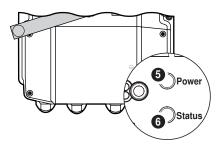

3 Auxiliary switch

Opening the auxiliary switch adjustment cover and adjusting the hand crank. Turn the crank until the arrow points to the vertical line

4 Terminals

Connect continuity tester to S4 + S5 or to S4 + S6. If the auxiliary switch should switch in the opposite direction, rotate the hand crank by 180° .

Push-buttons and display

5 Push-button and LED display green

Off: No power supply or malfunction

On: In operation

Press button: Triggers test run, followed by standard mode

6 Push-button and LED display yellow

Off: Standard mode On: Test run active

Flickering: BACnet / Modbus communication active Flashing: Request for addressing from MP master Press button: Confirmation of the MP addressing

Service

Service

NFC connection

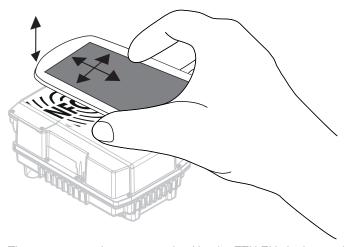

Belimo equipment marked with the NFC logo can be operated with the "Belimo Assistant App".

Requirement:

- NFC- or Bluetooth-capable smartphone
- Belimo Assistant App (Google Play & App Store)

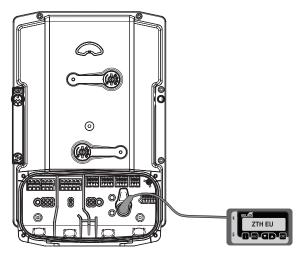

Align NFC-capable smartphone on the actuator so that both NFC antennas are superposed.

Connect Bluetooth-enabled smartphone via the Bluetooth-to-NFC Converter ZIP-BT-NFC to the actuator. Technical data and operation instructions are shown in the ZIP-BT-NFC data sheet.

Service Tools connection

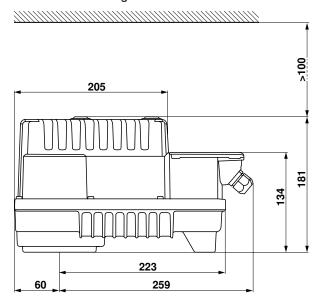

The actuator can be parameterised by the ZTH EU via the service socket.
