

Flow sensor

QVE3000.0xx
QVE3100.0xx

for liquids in DN10...25 pipes

- Vortex flow sensor made from robust red brass
- Output signal: DC 0...10 V or 4...20 mA
- Flow range: 1.8 ...150 l/min
- Used for temperature ranges: -15...+125 °C
- Operating voltage: DC 18...33 V (QVE3100...) or 11.5...33 V (QVE3000...)
- Temperature-insensitive measuring principle
- No moving parts
- Low pressure loss
- Insensitive to soiling

Use

The flow sensor is suited to continuously measure flow or monitor liquids such as hot water, heating water, or standard water-glycol mixes in HVAC plants and applications. The sensors can be used in automation and control systems as control sensor or measured value sensor.

Ordering

When ordering, please specify the quantity, type, and product name.

Type	Stock number	Designation
ASN	SSN	Product designation
QVE3000.010	S55720-S211	Flow sensor

Example:

1 flow sensor QVE3000.010

Delivery

Scope of delivery:

- Flow sensor with external thread connection
- Straight, 3-pin plug M12x1 with cable, 2 m
- Mounting instructions

Service life

10 year curve as related to flow and media temperature

Engineering notes

Warning

Operational safety of the supplied device is only guaranteed when used properly (flow measurement of liquids). Do not exceed under no circumstances the indicated limit values (see "Technical data").

Mounting notes

Smooth operation of the flow sensor is guaranteed only if the mounting instructions delivered with the product are adhered to completely. See also the following notes.

Avoid air bubbles in the medium

Install the flow sensor where the pipes are completely filled with the medium to be measured, and where gas bubbles and cavitation in the medium are avoided.

Note mounting position and flow direction

Mount the flow sensor only in the intended position or proper flow direction (note the arrow on the connecting pipe). The measured flow values will be wrong if the sensor is mounted in the wrong position or direction.

Further important notes

- The entire measuring path must be free of foreign bodies.
- Plan for sufficient settlement distance before the sensor inlet or outlet area to avoid eddying effects e.g. by curvatures, steps, changes to diameter, valves, pumps, etc..
- For this reason, strictly adhere to the recommended minimum distances as recommended in the mounting instructions.
- When mounting red brass-type flow sensors, use flat seals at the inlet and outlet of the red brass pipe.

Installation notes

- Comply with all local regulations on electrical systems.
- Use only qualified personnel for electrical installation.
- Always de-energize the system before connecting the wires of the mains cable.

Operating notes

Do not exceed maximum operating pressure as well as maximum medium temperature (see "Technical data").

Service notes

- Do not remove a flow sensor or its body from a piping system under pressure.
- The flow sensor is maintenance-free and cannot be repaired by the user.

Disposal

In terms of disposal, the QVE3x00.0xx flow sensor is an electronic device that cannot be disposed of together with domestic waste. Observe all relevant national regulations and dispose of the unit via appropriate channels. Local and currently valid legislation applies accordingly.
