

Modulating rotary actuator with emergency control function for ball valves

- · Nominal torque 20 Nm
- Nominal voltage AC/DC 24 V
- Control Modulating DC (0)2...10 V
- Position feedback DC 2...10 V
- Deenergised closed (NC)

Technical data Electrical data Nominal voltage AC/DC 24 V Nominal voltage frequency 50/60 Hz AC 19.2...28.8 V / DC 21.6...28.8 V Nominal voltage range Power consumption in operation 5.5 W 3 W Power consumption in rest position Power consumption for wire sizing 8.5 VA Connection supply / control Cable 1 m, 4 x 0.75 mm² Parallel operation Yes (note the performance data) **Functional data** Torque motor Min. 20 Nm Min. 20 Nm Torque spring return Positioning signal Y DC 0...10 V Positioning signal Y note Input impedance 100 k Ω DC 2...10 V Operating range Y Position feedback U DC 2...10 V Max. 0.5 mA Position feedback U note ±5% Position accuracy Y=0 (0V = A-AB = 0%)Direction of rotation motor Deenergised NC, valve closed (A - AB = 0%) Direction of rotation spring-return By means of hand crank and locking switch Manual override Angle of rotation 90° Running time motor 90 s / 90° Running time emergency setting position <20 s / 90° Sound power level motor max. 45 dB(A) Position indication Mechanical Service life Min. 60,000 emergency positions Safety Protection class IEC/EN III Safety extra-low voltage Protection class UL **UL Class 2 Supply** Degree of protection IEC/EN IP54 Degree of protection NEMA/UL NEMA 2, UL Enclosure Type 2 **EMC** CE according to 2004/108/EC Certification IEC/EN IEC/EN 60730-1 and IEC/EN 60730-2-14 Certification UL cULus according to UL 60730-1A, UL 60730-2-14 and CAN/CSA E60730-1:02 Mode of operation Type 1.AA 0.8 kV

Safety notes

Weight

· This device has been designed for use in stationary heating, ventilation and air conditioning systems and is not allowed to be used outside the specified field of application, especially in aircraft or in any other airborne means of transport.

Rotary spring-return actuator, Modulating, AC/DC 24 V, 20 Nm

Safety notes

- Only authorised specialists may carry out installation. All applicable legal or institutional installation regulations must be complied during installation.
- The device may only be opened at the manufacturer's site. It does not contain any parts that can be replaced or repaired by the user.
- The cables must not be removed from the device.
- The device contains electrical and electronic components and is not allowed to be disposed of as household refuse. All locally valid regulations and requirements must be observed.

Product features

Mode of operation The actuator is connected with a standard modulating signal DC 0...10 V. The actuator

moves the valve to the operating position at the same time as tensioning the return spring. The valve is turned back to the emergency position by spring force when the

supply voltage is interrupted.

Direct mounting Simple direct mounting on the ball valve with only one screw. The mounting orientation

in relation to the ball valve can be selected in 90° steps.

Manual override Manual actuation of the valve with manual elevator crank, engagement with the locking

switch at any position. Unlocking is manual or automatic by applying the operating

voltage.

High functional reliability The actuator is overload protected, requires no limit switches and automatically stops

when the end stop is reached.

Adjustable angle of rotation Adjustable angle of rotation with mechanical end stop.

Electrical installation

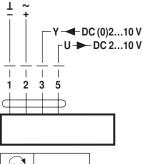

Notes

- · Connection via safety isolating transformer.
- Parallel connection of other actuators possible. Observe the performance data.
